The Business of Information

La renuncia de Rodríguez se notó en el Merval

Brazil GLB-01 Brazil GLB-27 México 'PAR'

El motor que impulsaba al Merval cambió de manos. Ayer bajó 0,77% y cerró a 616,91 unidades luego de haber estado con un pie adentro del terreno positivo, con una suba de 0,76% al inicio de la jornada.

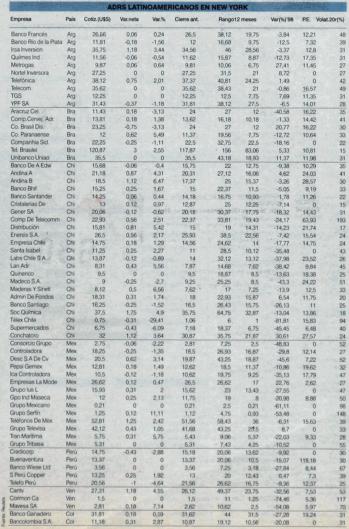

El nuevo conductor de los negocios locales es el contexto político luego de la renuncia del viceministro de Economía, Carlos Rodríguez.

La cautela ante la situación se transformó en la tercera toma de ganancias consecutiva que empuja al indicador un 1,08% hacia abajo luego de las va olvidadas ocho ruedas de

Reflejo de este cambio de manos es la buena situación de ayer que presentaron los mercados internacionales. Los principales referentes de Buenos Aires -Wall Street y San Pablo-subieron 1,01% y 2,43% respectivamente; las bolsas de Asia, que aún hace temer a los inversores, también terminaron en alza. Y también hubo subas en los demás mercados latinoamericanos

En el recinto tampoco hubo lugar para pensar en la exitosa colocación de 1.000 millones de dólares en Bontes. Si bien esta colocación y la de las Letes del martes le restaron liquidez a los negocios, la bolsa no tuvo un descenso pronunciado en las negociaciones: ayer fueron 29,2 millones de pesos entre 53 empresas contra los 31,7 millones del miércoles y sus 59 papeles

Entonces, la cautela ante la renuncia de Rodríguez parece adueñarse del mercado y, según operadores, la situación será igual en las próximas jornadas, con menos capital y caída de precios en las acciones.

Fusiones por un billón de dólares en los EEUU

El valor de las fusiones y adquisiciones de empresas en los Estados Unidos alcanzó la friolera de un billón de dólares durante 1998. La cifra supera ampliamente el nivel del año anterior, según datos de la compañía Securities Data.

En primer lugar se sitúan las instituciones financieras, con 226 acuerdos valorados en 224.000 millones de dólares y se destacan las fusiones de Travelers Group y Citicorp y la de Nationsbank y Bank America, anunciadas en abril.

El sector de las telecomunicaciones fue el segundo más activo con acuerdos valuados en 124.000 millones de dólares. Se destaca el de SBC Communication con Ameritech por aproximadamente 62.000 millones de dólares.

Los expertos pronostican nuevas fusiones que podrían sumar dos billones de dólares a fines de 1998, pero indican que en algunos casos las compañías prefieren esperar la respuesta de los accionistas antes que las fusiones queden concluidas.

Las bolsas de Brasil recuperan capitales

Si bien las bolsas de valores de Brasil perdieron en junio 897,14 millones de dólares en inversiones extranjeras, según un informe de la Comisión de Valores Mobiliarios, un documento de la Bolsa de San Pablo destaca que las inversiones se reactivaron en julio. Según analistas, la ayuda hacia Rusia y el cambio político en Japón colaboraron para que la confianza retorne a los mercados emergentes.

emergentes.
En junio, los extranjeros invirtieron
1.381,49 millones de dólares en las
bolsas de Brasil, principalmente las
de San Pablo y Río de Janeiro y retiraron 2.278,63 millones. El saldo negativo contribuyó para que el total
del capital extranjero invertido en el
mercado bursátil brasileño este año
se redujera a 1.405,75 millones al término del primer semestre del año.
En contrapartida, la dirección de la
Bolsa de Valores de San Pablo, la
principal de América latina, advirtió
que ese tipo de inversiones se reactivaron en julio. Entre mayo y junio
los inversores foráneos retiraron de
la bolsa paulista 914 millones de dó-

lares, pero en los primeros diez días

de este mes se registraron entradas líquidas de capital extranjero por 201

millones de dólares, es decir el 22%

del dinero retirado en junio.

Wall Street cerró por encima de sus máximos y le jugó mal a Europa; Asia subió

Los mercados bursátiles del mundo terminaron la jornada de ayer con saldos mixtos. Asía y Wall Street siguen una carrera firme con notables ganancias. Las bolsas de Europa sufrieron un traspié debido al mal arranque de Wall Street y una posterior toma de ganancias. En Wall Street, el Dow Jones cerró con una suba de 1,01% y rompió el techo de los 9.300 puntos al terminar en 9.328,19. El Nasdaq no se quedó atrás: si bien ganó 0,3%, superó por primera vez la barrera de las 2.000 unidades al cerrar a 2.000,56. Las ganancias trimestrales de las empresas superan las expectativas y la fortaleza del yen frente al dólar es un buen augurio de la situación asiática.

En Asia, el nuevo gobierno de Japón trae un "pan debajo del brazo", ya que se espera que sea capaz de encarar reformas y sanear la economía nacional. La bienvenida estuvo a cargo de los inversores haciendo que todas las bolsas de la régión subieran ayer, lideradas por Corea del Sur, con una espectacular suba de 5,4%. El yen no quiso estar ausente del festejo y cerró a 139,94 por dólar contra los 140,5 del miércoles. Con todo esto, los operadores tuvieron suficiente y aportaron alzas al resto de los mercados. Tokio subió 0,71%; Hong Kong 1,54%; e Indonesia 1,33%.

En cambio, los mercados europeos iniciaron la jornada cercanos a máximos históricos, pero luego miraron el tímido arranque de Wall Street y terminaron en baja. Una pequeña broma desde Nueva York. Londres bajó 0,56%; Zurich 0,39%; y Francfort 0,23%.

La Argentina colocó Bontes por US\$ 1.000 millones

El gobierno argentino colocó ayer 1.000 millones de dólares en el mercado por medio de Bonos del Tesoro (Bontes) a cinco años de plazo y a una tasa varia-ble. Con esta operación, la Argentina ya utilizó 10.500 millones de dólares de los 13.000 millones autorizados por el Presupuesto para lograr financiamiento este año. Las 225 ofertas cuadruplicaron la emisión: llegaron a 4.206,6 millones de dólares. De esa cifra, 3.997,7 millones fueron para el tramo competitivo (proponen valor de tasa) y 208,9 millones al no competitivo. Las tasas sugeridas oscilaron entre 4,57 puntos porcentuales y 2,60 puntos. La comisión que cobrarán las entidades colocadoras es de cuatro millones de dólares. El spread de corte fue de 3,20 puntos porcentuales sobre la tasa más alta que surgirá entre la encuesta para depósitos a plazo fijo en dólares entre 30 y 60 días que realiza el Banco Central, o la Libor del mercado de Londres. Si el costo se liquidara hoy, la tasa

sería cercana al 9,11%, ya que se considera un margen de 3,20 por sobre la encuesta del Banco Central, que cerró en la vispera al 5,91%. Si se hiciera sobre la Libor, el costo sería del 8,95%, pero el gobierno aceptó la condición de que la tasa a pagar sea la más alta.

La tasa flotante se pagará cada tres meses y la amortización del capital se concretará en el 2003.

A pesar de que hay dos Bontes en la plaza, este es el primer tífulo local que se negocia con tasa flotante. Los otros Bontes son a tasa fija.

Por primera vez, un banco estatal colocó directamente Bontes. Se trata del Bantco de la Ciudad de Buenos Aires, que lanzó 32 millones de dólares al mercado. El título, anunciado en junio y demorado por la inestabilidad que padecen los

El título, anunciado en junio y demorado por la inestabilidad que padecen los mercados internacionales, servirá para cubrir las necesidades financieras del cuarto trimestre, según la Secretaría de Financiamiento a cargo de Miguel Kiguel.

El maíz y la soja suben el uno por ciento en el mercado local

El rebote de la soja en Chicago se trasaldó al la plaza cerealera de Rosario, que operó con mercadería y pago inmediato a \$ 202 por tonelada; mientras que para mayo del '99 se realizaron negocios en \$ 206,5.
En el trigo disponible no se dieron variaciones

En el trigo disponible no se dieron variaciones en las cotizaciones, en tanto que en el mercado a futuro se alcanzaron subas de 0,45 %, en un marco que resultó bastante animado por el ingreso de un importante número de órdenes de compra. En maíz se dio un cierre alcista, tanto para el mercado físico el término, especialmente la posición abril del '99, que termino con una ganancia de \$ 1 por tonelada. El girasol siguió en baja ante la desfavorable evolución de los precios de los aceites en los mercados internacionales y la tranquilidad de la demanda exportadora. En tanto, el Mercado de Liniers no registró operaciones.

PROYECCIONES MACROECONOMICAS PRIVADAS

Chile: mejor calificación

El gobierno chileno destacó la calificación A+ que la agencia Duff & Phelp's otorgó a los pagarés reajus-tables en dólares (PRD), que el Banco Central comenzó a colocar la semana pasada en el mercado financiero.

Al finalizar las emisio-nes circularán 270 millones de dólares en PRD.

Como fundamento, Duff & Phelp's sostuvo que el compromiso chileno por mantener sus sólidas políticas macroeconómicas en los últimos diez años refuerza las calificaciones del país.
